

FOR IMMEDIATE RELEASE

### Tallman Equipment Co. Inc. Adds SNT Safety Instrument

August 20, 2015 – Battle Ground, WA – Delta Computer Systems, Inc. is pleased to announce a new representation agreement with Tallman Equipment Company for the SNT-02 Safety Instrument and Kit. As part of this agreement Tallman Equipment Company will be focusing on the Transmission portion of the Utility Industry. Geographic coverage by Tallman includes all or portions of the states of Illinois, Missouri, Indiana, Michigan, Wisconsin, Western Ohio, Eastern Iowa and the Southern part of Minnesota.

**SNT-02 kit (above) includes the SNT instrument, ground rod with slide hammer, clamps and other accessories.** Go to [www.stepandtouch.com](http://www.stepandtouch.com) for more information.

The SNT-02 continuously monitors for and warns against Step and Touch voltages due to Ground Potential Rise or GPR, improving job site safety. “We are pleased to add representation by Tallman in the Midwestern USA because the need for this capability has become more important over the last decade as more power corridors have increased in complexity—often driven by growth in green energy”, stated Steve Nylund, CEO of Delta Computer Systems. “The BPA, contractors and investor owned utility customers have found the SNT to be very valuable and Delta is pleased to bring this product to the general market.” Nylund added.
